Důležité!

Před montáží si pečlivě přečtete tento manuál. Dodržujte postup uvedený v těchto instrukcích. Manuál uchovejte na bezpečném místě v případě budoucí potřeby.

pokud narazíte na tuto ikonu, obraťte se na příslušný montážní krok kvůli dalším poznámkám a informacím.

Tato ikona značí, že by měla sestavující osoba stát uvnitř domku.

Budete potřebovat

K montáži domku (tyto položky nejsou součástí balení)

**Bezpečnost**

- ☒ Domek musí být umístěn a zafixován na rovném povrchu, aby byla zajištěna stabilita domku. Ujistěte se, že jsou šroubky a kotvy kompatibilní s typem povrchu.
- ☒ Některé části mají kovové okraje. Při zacházení s takovými součástkami dbejte zvýšené opatrnosti. Během montáže nebo údržby domku vždy noste rukavice, ochranu očí a dlouhé rukávy.
- ☒ Domek nestavte během větrných dní nebo při nízkých teplotách. Při použití štaflů nebo elektrického nářadí dodržujte bezpečnostní pokyny výrobce.
- ☒ Nestoupejte na střechu.
- ☒ Uvnitř domku neskladujte horké předměty, jako např. právě použitý gril, letovací lampu apod.
- ☒ Těžké nebo ostré předměty by se neměly opírat o stěny domku.
- ☒ Nedovolte dětem, aby si hrály s balíci materiály, hrozí nebezpečí zadušení.

Před montáží

- ☒ Velmi doporučujeme, aby domek sestavovaly dvě osoby.
- ☒ Rozdělte části domku a zkontrolujte je podle seznamu částí.
- ☒ Domek musí být umístěn a zafixován na rovném povrchu.
- ☒ Během montáže dbejte bezpečnostních opatření.

Během montáže

! Pozor:

- ☒ Hladká strana panelu je vnitřní strana domku.
- ☒ Je důležité provrtat šroubky na vrchu hřebenáče a ujistěte se, že prošly skrz panel, tím se zajistí maximální odolnost domku.
- ☒ Ujistěte se, že spodní prahový panel směřuje k podlaze domku a že ji překrývá.

Krok 3:

Než připevníte panel k profilu, ujistěte se, že okraj panelu překrývá profil a přivrtajte první šroubek (**krok 3a**). Panel natáhněte na druhou stranu, dokud nepřekryje profil, přivrtajte druhý šroubek (**krok 3a**) a poté pokračujte se zbylými šroubky podél profilu (**krok 4**).

! Pozor: Připevněte profily k panelům s ohledem na správnou pozici popsanou v manuálu!

Kroky 7 + 13:

Než vložíte panel do profilu **7377**, dávejte pozor na pozici profilu, jak je popsáno v kroku **7a/13a**.

Krok 22:

Ujistěte se, že šroubek prochází skrz panel a základnu.

Krok 29:

Vložte profil **7362** na panel, až k prvnímu výstupku ve střešní rohové krytce **7402**.

Krok 33:

Až budete přidělovat střechu na konstrukci domku, ujistěte se, že je konstrukce umístěna uvnitř střešních otvorů.
